# INDEX OF AUTHORS VOLUME 15

A

Ackerman, G. A. *See* Paris Zinsmeister and Ackerman 673

Anderson, E. and Batten, B. Surface binding, uptake and fate of cationic ferritin in a steroid producing ovarian cell 853

B

Bairati, A. *See* Vitellaro-Zuccarello, De Biasi and Bairati 547

Barra, J.-A., Pequeux, A. and Humbert, W. A morphological study on gills of a crab acclimated to fresh water 583

Batten, B. *See* Anderson and Batten 853

Bilinski, S. Differentiation of the oocyte and nurse cells in an apterygote insect *(Campodea)* 965

Binnington, K. C. Ultrastructural identification of neurohaemal sites in a tick: evidence that the dorsal complex may be a true endocrine gland 317

Blumenfeld, O. O. *See* Goldfischer, Coltoff-Schiller, Schwartz and Blumenfeld 429

Bounelis, P. and Daniel, J. C. The effect of ascorbate on embryonic chick sternal chondrocytes cultured in agarose 683

Brac, T. Charged sieving by the basal lamina and the distribution of anionic sites on the external surfaces of fat body cells 489

—, Intracellular polycationic molecules cause reversible swelling of the rough endoplasmic reticulum 365

—, Lamellar bodies are the intracellular site of membrane turnover in insect fat body 873

Brown, M. J. *See* Burke, Brown and Jacobson 181

Brownstein, B. L. *See* Connor, Vassalluzzo, Sheffield and Brownstein 983

Bubel, A. A fine structural study of the calcareous opercular plate and associated cells of a polychaete annelid 457

—, An ultrastructural investigation of muscle attachment in the opercular filament of a polychaete annelid 555

Burke, D., Brown, M. J. and Jacobson, B. S. Hela cell adhesion to microcarriers in high shear conditions: evidence for membrane receptors for collagen but not laminin or fibronectin 181

C

Cancalon, P. Influence of a detergent on the catfish olfactory mucosa 245

Cardell, R. R. *See* Jerome and Cardell 711

Carey, T. R. *See* Nag, Carey and Cheng 597

Carnes, J. *See* Mia, Tarapoom, Carnes and Yorio 737

Cartaud, J. *See* Pinçon-Raymond, Ludosky, Cartaud and Rieger 205

Cayer, M. L. *See* Hayashi, Wozniak, Cayer and Smith 955

—, *See* Hyder, Cayer and Pettey 437

Chan, L. *See* Lin, Su, Palmer and Chan 259

Chang, J. P. *See* Moller, Chang and Partridge 39

Cheng, M. *See* Nag, Carey and Cheng 597

Cioffi, M. and Wolfersberger, M. G. Isolation of separate apical, lateral and basal plasma membrane from cells of an insect epithelium, A procedure based on tissue organization and ultrastructure 781

Coltoff-Schiller, B. *See* Goldfischer, Coltoff-Schiller, Schwartz and Blumenfeld 429

Connor, C. G., Vassalluzzo, P., Sheffield, J. B. and Brownstein, B. L. Alterations of the cytoplasmic organization of WIRL cells induced by trifluoperazine 983

Crawford, B. J. Some factors controlling cell polarity in chick retinal pigment epithelial cells in clonal culture 993

Credland, P. F. Organization of the cuticle in an aquatic fly larva 477

Croghan, P. C. *See* Finol and Croghan 63

D

Dacheux, F. *See* Meusy, Zerbib, Dacheux and Dubois 301

Daniel, J. C. *See* Bounelis and Daniel 683

Davidson, L. A. A freeze fracture and thin section study of intestinal cell membranes and intercellular junctions of a nematode 27

De Biasi, S. *See* Vitellaro-Zuccarello, De Biasi and Bairati 547

Denys, C. J. Ultrastructure of the eye of a euphausiid crustacean 77

DeRosa, R. A. *See* Govind and DeRosa 97

Dinsdale, D. Ultrastructural localization of calcium, by electronprobe X-ray microanalysis, in the small intestine of suckling rats 417

Douglas, W. H. J. *See* Lee, Douglas, Lin and Fanburg 193

Dubois, M. P. *See* Meusy, Zerbib, Dacheux and Dubois 301

E

Edwards, H. A. and Harrison, J. B. An osmoregulatory syncytium and associated cells in a fresh water mosquito 271

Elder, H. Y. *See* McEwan Jenkinson, Nimmo, Jackson, McQueen, Elder, Mackay and Montgomery 573

Ettlin, R. *See* Russell, Lee, Ettlin and Malone 391
—, *See* Russell, Lee, Ettlin and Peterson 615

F

Fairman, K. and Jacobson, B. S. Unique morphology of HeLa cell attachment, spreading and detachment from microcarrier beads covalently coated with a specific and non-specific substratum 167
Fanburg, B. L. *See* Lee, Douglas, Lin and Fanburg 193
Finol, H. J. and Croghan, P. C. Ultrastructure of the branchial epithelium of an amphibious brackish-water crab 63
Furuya, K. *See* Furuya and Furuya
Furuya, S. *See* Furuya and Furuya
Furuya, S. and Furuya, K. Ultrastructural changes in differentiating neuroblastoma×glioma hybrid cells 903

G

Garcia-Herdugo, G. *See* Gracia-Navarro, Gonzalez-Reyes, Guerrero-Callejas and Garcia-Herdugo 729
Garrone, R. *See* Lethias, Garrone and Mazzorana 523
Goldfischer, S., Coltoff-Schiller, B., Schwartz, E. and Blumenfeld, O. O. The infrastructure of aortic elastic fibers 429
Gonzalez-Reyes, J. A. *See* Gracia-Navarro, Gonzalez-Reyes, Guerrero-Callejas and Garcia-Herdugo 729
Goudeau, M. and Lachaise, F. Structure of the egg funiculus and deposition of embryonic envelopes in a crab 47
Gould, R. M. *See* Koulish and Gould 749
Govind, C. K. and DeRosa, R. A. Fine structure of comparable synapses in a mature and larval lobster muscle 97
Gracia-Navarro, F., Gonzalez-Reyes, J. A., Guerrero-Callejas, F. and Garcia-Herdugo, G. Electron microscopic study of stellate cells and cavities in the pars distalis of frog pituitary 729
Green, C. R. and Severs, N. J. A simplified method for the rapid isolation of cardiac intercalated discs 17
Gremigni, V. and Nigro, M. An ultrastructural study of oogenesis in a marine triclad 405
Greven, H. and Robenek, H. Freeze-fracture studies on tardigrade cuticle 329
Guerrero-Callejas, F. *See* Gracia-Navarro, Gonzalez-Reyes, Guerrero-Callejas and Garcia-Herdugo 729

H

Hadley, N. F. *See* Hendricks and Hadley 761
Hard, R. and Rieder, C. L. Mucociliary transport in newt lungs: the ultrastructure of the ciliary apparatus in isolated epithelial sheets and in functional triton-extracted models 227
— and Weaver, A. Newt lungs: a versatile system for the study of mucociliary transport 217
Harrison, J. B. *See* Edwards and Harrison 271
Hayashi, T., Wozniak, P., Cayer, M. L. and Smith, D. S. Actin-myosin interaction: the role of myosin in determining the actin pattern in self-assembled 'hybrid' contractile units 955
Hendricks, G. M. and Hadley, N. F. Structure of the cuticle of the common house cricket with reference to the location of lipids 761
Holtzman, E. *See* Matheke, Kalff and Holtzman 509
Horváth, I., Zs-Nagy, I., Lustyik, G. and Varádi, G. The effect of primycin on the intracellular monovalent ion and water content of rat hepatocytes as revealed by energy dispersive X-ray microanalysis and interference microscopy 515
Hufnagel, L. A. *See* Lane, Sattelle and Hufnagel 921
Huie, P. *See* Locke and Huie 885
Humbert, W. *See* Barra, Pequeux and Humbert 583
Hyder, S. L., Cayer, M. L. and Pettey, C. L. Cell types in peripheral blood of the nurse shark: an approach to structure and function 437

J

Jackson, D. *See* McEwan Jenkinson, Nimmo, Jackson, McQueen, Elder, Mackay and Montgomery 573
Jacobson, B. S. *See* Burke, Brown and Jacobson 181
—, Interaction of the plasma membrane with the cytoskeleton: an overview 829
—. *See* Fairman and Jacobson 167
Jerome, W. G. and Cardell, R. R. Observations on the role of smooth endoplasmic reticulum in glucocorticoid-induced hepatic glycogen deposition 711
Jorgensen, W. K. and Rice, M. J. Morphology of a very extensible insect muscle 639

K

Kalff, M. *See* Matheke, Kalff and Holtzman 509
Knibiehler, B., Mirre, C. and Stahl, A. Multiplication of nucleolar fibrillar centres and absence of rDNA amplification in mouse oocyte during meiotic prophase I. 159
Koulish, S. and Gould, R. M. Autoradiographic and fine structural study of chitin deposition in the cuticle of a barnacle using [$^3$H]-D-Glucosamine incorporation 749
Kowal, J. *See* Mattson and Kowal 805

L

Lachaise, F. *See* Goudeau and Lachaise 47
Lampson, L. *See* Wachsberger, Lampson and Pepe 341
Lane, N. J., Sattelle, D. B. and Hufnagel, L. A. Pre- and post-synaptic structures in insect CNS: intramembranous features and sites of $\alpha$-bungarotoxin binding 921
—, *See* Roots and Lane 695
Larsen, W. J. Biological implications of gap junction structure, distribution and composition: a review 645
—. *See* Risinger and Larsen 1
Lea, A. O. *See* Raikhel and Lea 281
Lee, I. P. *See* Russell, Lee, Ettlin and Malone 391
—. *See* —, —, — and Peterson 615

# INDEX OF SUBJECTS VOLUME 15

A

Acrosome, development of, and alignment, elongation and entrenchment of the spermatids in procarbazine treated rats 615
—, the rat, after administration of procarbazine 391
ACTH, reversibility of effects of, on adrenocortical tumor cells 805
Actin, -myosin interaction: role of myosin in determining the actin pattern in self-assembled contractile units 673
Adipocytes, crustacean, localization of vitellogenin in 301
Adrenal, cortex, of rat, lipid droplets in 975
Agglutinin, wheat germ, -binding sites on normal human blood cells 805
Anionic sites, distribution of, on external surfaces of fat body cells, charged sieving by the basal lamina and 489
Annelid, earthworm, myelination glia in giant axons of 695
—, polychaete, a fine structural study of the calcareous opercular plate and associated cells in 457
—, —, an ultrastructural investigation of muscle attachment in the opercular filament in 555
Antarctic, eye of a euphausiid crustacean, ultrastructure of 77
Antibody, monoclonal, to skeletal muscle myosin S1 heavy chain, nonuniform staining of myofibril A bands with 341
—, unlabelled enzyme method, localization of vitellogenin in crustacean adipocytes by 301
Antidiuretic hormone, alteration in surface substructure of frog urinary bladder by 737
Aorta, infrastructure of aortic elastic fibers 429
Ascites carcinoma, invasion of mouse parietal peritoneum, inflammation with restricted proteolysis during 499
Ascorbate, effect of, on embryonic chick sternal chondrocytes cultured in agarose 683
Atrial proliferative response, in heart of adult newt 351
Autophagy, in sea anemone tentacle cells 939
Autoradiography, of light- and EM, of atrial proliferative response following partial ventricular amputation in heart of newt 351
—, of chitin deposition in the cuticle of a barnacle, using $^{3}$H-D-glucosamine incorporation 749

B

Basal lamina, 885
——, charged sieving by, in insect fat body cells 489
Bladder, frog urinary, alteration in surface substructure of, by calcium ionophore, verapamil and antidiuretic hormone 737
Blood cells, normal human, surface localization of wheat germ agglutinin and concanavalin-A binding sites on 673
—, peripheral, of nurse shark, cell types in: an approach to structure and function 437
Branchial epithelium, of an amphibious brackish-water crab 63
$\alpha$-bungarotoxin, sites of binding, in insect CNS 921
Byssus apparatus, of mussel, collagenic and elastic components 549

C

Calcification, of opercular plate in a serpulid annelid 457
Calcium, ultrastructural localization of, by electron-probe microanalysis, in small intestine of suckling rats 417
Carcinoma, ascites, in mouse parietal peritoneum 499
Cationic ferritin, 853
Cell attachment, to microcarrier beads 167, 181
— degeneration, during early development of hymenopteran olfactory sensilla 823
— junctions, luminal, comparative studies on the effect of thermal stimulation on the permeability of, to lanthanum 575
— polarity, in chick pigment epithelial cells 993
Charged tracers, 365, 489, 853, 885
Chitin, deposition of, in a barnacle 749
—, — —, in cuticle of a barnacle, autoradiographic and fine structural study of, using $^{3}$H-D-glucosamine incorporation 749
Chondrocytes, embryonic chick, effect of ascorbate on 683
Cilia, mucociliary transport in newt lungs: the ultrastructure of the ciliary apparatus in isolated epithelial sheets and in functional triton-extracted models 227
—, newt lung: a versatile system for the study of mucociliary transport 217
—, of rabbit tracheal epithelial cultures, localization of tubulin in 39
Clonal culture, of chick retinal pigment epithelial cells 993
Coelenterate, hydromedusan, ultrastructure and cytochemistry of glycogen-containing vacuoles in gastrodermal cells in developing hydranths of 539
—, sea anemone, comparative ultrastructure of catch tentacles and feeding tentacles in 939
Collagen, localization of, in byssus threads of a mussel 549
—, receptors for, in HeLa cells 181
Colloidal gold, immunocytochemical localization of tubulin with 39
Concanavalin-A, -binding sites, on normal human blood cells 673

Contractile units, 'hybrid', role of myosin in determining the actin pattern in 955
Copper, -containing granules in fat body cells 311
Crustacean, adipocytes, subcellular localization of vitellogenin in 301
—, barnacle, autoradiographic and fine structures study of chitin deposition in cuticle of 749
—, crab, branchial epithelium in 63
—, —, gills, acclimated to fresh water 585
—, —, structure of egg funiculus and embryonic envelopes in 47
—, euphausiid, ultrastructure of eye of 77
—, lobster, synapses in larval and mature muscle of 97
—, —, tonic muscle of 955
Cuticle, crab 47
—, integumental glands of termite soldier, fine structure of 107
—, of an aquatic fly larva, organization of 477
—, of common house cricket, structure of, with reference to location of lipids 761
—, of tardigrade, freeze-fracture studies on 329
Cytochalasin B, reversibility of effects of, on adrenocortical tumor 805
Cytoskeleton, interaction of, with the plasma membrane: an overview 829

D

Dense cored vesicles, in differentiating neuroblastoma × glioma hybrid cells 903
Digestive system, gallbladder epithelia of rainbow trout and tench 121
— —, intestinal cell membranes in a nematode, freeze-fracture study of 27
DNA synthesis, in rat heart cells after injury, and the regeneration of myocardia 599
Dorsal complex, of tick 317

E

Ecdysteroid, in embryonic development of a cockroach 375
— s, in crab 47
Ectodermal coating, in cockroach embryo 375
Elasmobranch, nurse shark, cell types in peripheral blood of 437
Elastin, infrastructure of aortic elastic fibers 429
—, localization of, in byssus threads of a mussel 549
Embryo, chick, sternal chondrocytes in, effect of ascorbate 683
Embryonic envelopes, deposition of, in a crab 47
— membrane, deposition in a cockroach 375
Endocrine system, alteration in surface substructure of frog urinary bladder by calcium ionophore, verapamil and antidiuretic hormone 737
— —, EM study of stellate cells and cavities in the pars distalis of frog pituitary 729
— —, lipid droplets in the adrenal cortex of the rat. Preservation after tannic acid-paraformaldehyde-glutaraldehyde fixation and extraction during staining 975
— —, somatostatin biosynthesis in dog pancreas 259
— —, surface binding, uptake and fate of cationic ferritin in a steroid producing ovarian cell 853
— —, the reversibility of the effects of ACTH and cytochalasin B on the ultrastructure and steroidogenic activity of adrenocortical tumor cells *in vitro* 823
— —, ultrastructural identification of neurohaemal sites in a tick: evidence that the dorsal complex may be a true endocrine gland 317
Endocytosis, in a steroid producing ovarian cell 853
Endoplasmic reticulum, rough, intracellular polycationic molecules cause reversible swelling of 365
— — smooth, role of, in glucorticoid-induced hepatic glycogen deposition 711
Endothelial cells, bovine pulmonary, irradiated *in vitro* with a $^{137}$Cs source 193
Enterocytes, of neonatal rats, localization of calcium in 417
Epithelial sheets, of newt lung, functional triton-extracted models 227
Epithelium, isolation of separate apical, lateral and basal plasma membrane from 227
Erythrocyte, in peripheral blood of nurse shark 437
Exuviae, cuticular, of aquatic fly larva 477
Eye, of euphausiid crustacean, ultrastructure of 77

F

Fat body, insect, distribution of anionic sites on external surface of 489
— —, —, lamellar bodies are the site of intracellular membrane turnover in 873
— —, —, tyrosine storage vacuoles in 137
— —, of homopteran insects, X-ray microanalysis of copper and sulphur-containing granules in 311
— —, of mosquito, previtellogenic development and vitellogenin synthesis in 281
Ferritin, anionic 365
—, cationic 365, 489, 853
Fibronectin, absence of evidence for receptors, in HeLa cells 181
Filipin, interaction of, with junctional membranes at different stages of the junction's life history 1
Fish, rainbow trout and tench, gallbladder epithelia of 121
Freeze-fracture, biological implications of gap junction structure, distribution and composition: a review 645
— —, interaction of filipin with junctional membranes 1
— —, interaction of the plasma membrane with the cytoskeleton: an overview 829
— —, myelinating glia of earthworm giant axone: thermally-induced intramembranous changes in 695
— —, of intestinal intercellular junctions in a nematode 27
— —, of sponge cell membranes 523
— —, pre- and post-synaptic structures in insect CNS: intramembranous features and sites of α-bungarotoxin binding 921
— —, studies on tardigrade cuticle 329
Funiculus, egg, structure of, in a crab 47

G

Gallbladder epithelia, of rainbow trout and tench, ultrastructural and histochemical study of 121
Gap junctions 1
— —, biological implications of; structure, distribution and composition 645
Gastroderm, in developing hydranths of hydromedusan coelenterate, glycogen-containing vacuoles in 539
Gill, of amphibious brackish-water crab 63
Gills, of a crab, a morphological study of, acclimated to fresh water 585
Glia, myelinating, of earthworm, giant axone: thermally-induced intramembranous changes in 695
Glioma, × neuroblastoma hybrid cells, ultrastructural changes in differentiating 903
Glucocorticoid, -induced hepatic glycogen deposition 711
Glucosamine, $^{3}$H-D-, incorporation, in study of chitin deposition in barnacle cuticle 749
Glycogen body, in gallbladder epithelia of fish 121
— deposition, glucocorticoid-induced hepatic, role of smooth ER in 711
— -containing vacuoles, in gastrodermal cells in developing hydranths of a hydromedusan coelenterate 539
Granulosa cells 853

H

HeLa cell, unique morphology of attachment, spreading and detachment from microcarrier beads covalently coated with a specific and non-specific substratum 167
Hemolymph, insect, tyrosine metabolism 137
Hepatocytes, rat, intracellular monovalent ion and water content of 515
HVEM, inflammation with restricted lysosomal proteolysis during early ascites carcinoma invasion of mouse parietal peritoneum, a medium and high voltage EM and cytochemical study 499
Hydroid, of hydromedusan coelenterate, glycogen-containing vacuoles in gastrodermal cells of 539

I

Immunocytochemistry, localization of vitellogenin in crustacean adipocytes by the unlabelled antibody enzyme method 301
—, nonuniform staining of myofibril A bands by a monoclonal antibody to skeletal muscle myosin S1 heavy chain 341
—, of somatostatin biosynthesis 259
—, of vitellogenin synthesis, in mosquito fat body 281
—, surface localization of wheat germ agglutinin and concanavalin-A binding sites on normal human blood cells 673
Insect, apterygote, differentiation of the oocyte and nurse cells in 965
—, aquatic fly larva, organization of the cuticle of 477
—, CNS, pre- and post-synaptic structures in 921
—, cockroach, oenocyte differentiation in 375
—, epithelium, isolation of separate apical, lateral and basal plasma membrane from cells of 781
—, fat body, charged sieving by the basal lamina and the distribution of anionic sites on the external surface of 489
—, — —, lamellar bodies are the intracellular site of membrane turnover in 873
—, — —, tyrosine storage vacuoles in 137
—, fresh water mosquito, osmoregulatory syncitium and associated cells in 271
—, house cricket, structure of the cuticle of, with reference to the location of lipids 761
—, hymenopteran, olfactory sensilla, cell degeneration during early development of 823
—, larval mayfly, ultrastructural evidence for paracellular fluid glow in the Malpighian tubules of 627
—, mosquito, previtellogenic development and vitellogenin synthesis on fat body of 281
—, salivary glands of, microinjection of polycationic molecules 365
—, termite soldier, fine structure of the integumental glands in 107
—s, homopteran, X-ray microanalysis of copper and sulphur-containing granules in fat body cells of 311
Integumental glands, fine structure of, in termite soldier 107
Intercalated discs, of cardiac muscle, isolation of 17
Interference microscopy, and X-ray microanalysis, effect of primycin on intracellular monovalent ion and water content of rat hepatocytes revealed by 515
Intermediate filaments, in WIRL cells 983
Ionophore, calcium, alteration in surface substructure of frog urinary bladder by 737
Irradiation, of bovine pulmonary endothelial cells, with $^{137}$Cs 193
Islets, pancreatic, of dog, somatostatin biosynthesis in 259

J

Junctional membranes, gap-, biological implications of structure of 645
Junctions, gap, biological implications of 645

L

Lamellar bodies, are the intracellular site of membrane turnover in insect fat body 873
Laminin, absence of evidence for receptors, in HeLa cells 181
Lanthanum, permeability of luminal cell junctions to, in thermally stimulated sweat glands 575
Leucocyte, in peripheral blood of nurse shark 437
Lipid droplets, in adrenal cortex of rat: preservation after tannic acid-paraformaldehyde-glutaraldehyde fixation and extraction during staining 975
— transport, a function for plasma membrane reticular systems 885
Lipids, location of, in cuticle of house cricket 761

Lungs, newt: a versatile system for the study of mucociliary transport 217
—, —: ultrastructure of the ciliary apparatus in isolated epithelial sheets and in functional triton-extracted models 227
Lysosome, inflammation with restricted lysosomal proteolysis during early ascites carcinoma invasion of mouse parietal peritoneum. A medium and high voltage electron microscopic and cytochemical study 499
—, in steroid producing ovarian cell 853

M

Malpighian tubules, of larval mayfly, paracellular fluid flow in 627
Membrane, isolation, of separate apical, lateral and basal, from cells of an insect epithelium. A procedure based on tissue organization and ultrastructure 781
—, plasma, interaction of, with the cytoskeleton 829
—, —, reticular systems of, function for 885
— recycling, tyrosine storage vacuoles in insect fat body 137
— turnover, in a steroid producing ovarian cell 853
— —, lamellar bodies are the site of, in fat body 873
Membranes, cell, of sponge, fine structure of 523
—, junctional, in nematode intestine 27
—, —, interaction of filipin with 1
Microfibrils, in aortic elastic fibers 429
Microcarrier beads, covalently coated with a specific and non-specific substratum, attachment of HeLa cells to 167
— —, HeLa cell adhesion to, in high shear conditions: evidence for membrane receptors for collagen but not laminin or fibronectin 181
Microinjection, of polycationic molecules 365
Microtubules, ciliary, of tracheal epithelium 39
Mollusc, the ultrastructure of the byssus apparatus of a mussel. V. Localization of collagenic and elastic components in the threads 549
Monensin, effects of, on phtotoreceptors of isolated frog retinas 509
Monoclonal antibody, to skeletal muscle myosin S1 heavy chain 341
Monovalent ion, and water content, of rat hepatocytes 515
Motor endplate disease, in mouse 205
Mucociliary transport, in newt lungs, system for study of 217
— —, — — —, ultrastructure of the ciliary apparatus in isolated epithelial sheets and in functional triton-extracted models 227
Mucosa, olfactory, of catfish, influence of a detergent on 245
Muscle, actin-myosin interaction: the role of myosin in determining the actin pattern in self-assemble 'hybrid' contractile units 955
— attachment, in the opercular filament of a polychaete annelid, an ultrastructural investigation of 557
—, cardiac, a simplified method for the rapid isolation of cardiac discs 17
—, —, the atrial proliferative response following partial ventricular amputation in the heart of the adult newt. A light and electron microscopic autoradiographic study 351
—, —, DNA synthesis in rat heart cells after injury and the regeneration of myocardia 599
—, charged membranes in 885
—, lobster, mature and larval, fine structure of comparable synapses in 97
—, morphology of a very extensible insect muscle 639
—, skeletal, myosin S1 heavy chain, nonuniform staining of myofibril A bands by a monoclonal antibody to 341
—, soleus slow-twitch, of mouse, motor endplate disease in 205
—, tonic, of lobster, role of myosin in determining the actin pattern in 955
—, Z-band, in a very extensible insect muscle 639
Myelin, in glia of earthworm giant axons 695
Myocardia, regeneration of, after injury 599
Myogenesis, *in vitro* study of hybrid actin-myosin contractile units 955
Myosin, skeletal muscle, S1 heavy chain, monoclonal antibody to 341
—, -actin interaction: role of myosin in determining the actin pattern in self-assembled contractile units 955
Myotendon junction, in opercular filament of an annelid 557

N

Nematocytes, of sea anemone tentacles 939
Nematode, freeze-fracture and thin section study of intestinal cell membranes and intercellular junctions of 27
Nervous system, fine structure of comparable synapses in a mature and larval lobster muscle 97
— —, intense ultraterminal sprouting from motor nerves and ultrastructural aspects of the neuromuscular junction and non-junctional sarcolemma of the soleus slow-twitch muscle in motor endplate disease in the mouse 205
— —, myelinating glia of earthworm giant axons: thermally induced intramembranous changes 695
— —, pre- and post-synaptic structures in insect CNS: intramembranous features and sites of $\alpha$-bungarotox-in binding 921
— —, sensory, eye of euphausiid crustacean 77
— —, ultrastructural changes in differentiating neuroblastoma×glioma hybrid cells 903
Neuroblastoma, ×glioma hybrid cells, ultrastructural changes in differentiating 903
Neurohaemal sites, in a tick, ultrastructural identification of 317
Neuromuscular junction, and non-junctional sarcolemma, in mouse soleus slow-twitch muscle 205
Nuclear envelope, of rat spermatids 615
Nucleolar fibrillar centres, multiplication of, and absence of rDNA amplification in mouse oocyte during meiotic prophase I 159

Nucleolus, of mouse oocyte, fibrillar centres in 159
Nucleus, multiplication of nuclear fibrillar centres and absence of rDNA amplification in mouse oocytes during meiotic prophase I 159
Nurse cells, and oocyte, of apterygote insect, differentiation of 965

O

Oenocyte differentiation, correlated with the formation of ectodermal coating in the embryo of a cockroach 375
Olfactory mucosa, influence of a detergent on 245
— sensilla, hymenopteran, cell degeneration during early development of 823
Oocyte, and nurse cells of apterygote insect 965
Oogenesis, in a marine triclad 405
Opercular filament, of a polychaete annelid, muscle attachment in 557
— plate, in a polychaete annelid, fine structural study 457
Opsin, in photoreceptors of isolated frog retinas 509
Osmoregulation, a morphological study on gills of a crab acclimated to fresh water 585
—, ultrastructural evidence for paracellular fluid flow in the Malpighian tubules of a larval mayfly 627
Osmoregulatory syncytium, and associated cells in a fresh water mosquito 271
Ovarian cell, steroid producing, surface binding, uptake and fate of cationic ferritin in 853
Oxytalan, in aortic elastic fibers 429

P

Pancreas, of dog, immunoelectron microscopic study of somatostatin biosynthesis in 259
Peritoneum, mouse, invasion of in ascites carcinoma 499
Phagocytosis, of yeast, by nurse shark blood cells 437
Phenothiazines, effect of, on WIRL cells 983
Photoreceptors, of eye of euphausiid crustacean 77
—, of isolated frog retinas, effects of monensin on 509
Pigment epithelial cells, chick retinal, polarity in 993
Pituitary, frog, stellate cells and cavities in pars distalis of 729
Platyhelminth, marine triclad, oogenesis in 405
Polycationic molecules, intracellular, cause reversible swelling of rough endoplasmic reticulum 365
Primycin, effect of, on the intracellular monovalent ion and water content of rat hepatocytes as revealed by energy dispersive X-ray microanalysis and interference microscopy 515
Procarbazine, morphological pattern of response after administration of: alteration of specific cell associations during the cycle of the seminiferous epithelium of the rat 391
Progesterone, surface binding, uptake and fate of cationic ferritin and 853
Prothoracic gland, differentiation of, in cockroach embryo 375
Pulmonary artery, endothelial cells, ultrastructural changes in 193

R

rDNA, absence of amplification of, in mouse oocyte during meiotic prophase I 159
Receptors, membrane, evidence for, in HeLa cells 181
—, olfactory, influence of detergent on 245
Reproductive system, development of the acrosome 615
— —, mouse oocyte, during meiotic prophase I, multiplication of nucleolar fibrillar centres 159
— —, structure of egg funiculus and deposition of embryonic envelopes in a crab 47
Respiratory system, branchial epithelium of crab 63
Retina, pigmented epithelium of, in clonal culture 993
—s, frog, effects of monensin on photoreceptors in isolated 509
Rod cells, in isolated frog retina 509
Ruthenium red, staining of aortic elastic fibers 429

S

Salivary glands, of insect, reversible swelling of rough ER in, caused by intracellular polycationic molecules 365
Sarcolemma, non-junctional, and neuromuscular junction, in soleus slow-twitch muscle 205
Seminiferous epithelium, rat, alteration of specific cell associations during the cycle of, after administration of procarbazine 391
Somatostatin, biosynthesis of, in dog pancreas, immunoelectron microscopic study of 259
Spermatid, alignment, elongation and entrenchment of, in procarbazine treated rats 615
Spermatogenesis, development of the acrosome and alignment, elongation and entrenchment of spermatids in procarbazine treated rats 615
—, in rat, after administration of procarbazine 391
Spermiogenesis, in rat, after administration of procarbazine 391
Sponge, cell membranes, fine structure of: comparative study with freeze-fracture and conventional thin section methods 523
Stellate cells, and cavities in frog pituitary 729
Steroid, glucocorticoid-induced hepatic glycogen deposition, role of smooth ER in 711
—, -producing ovarian cell, surface binding, uptake and fate of cationic ferritin in 853
Sulphur, -containing granules in fat body cells 311
Supercontraction, in an insect muscle 639
Superextension, in an insect muscle 639
Surface charge, on membranes 365, 489, 853, 855
Sweat gland, permeability of to lanthanum, comparative studies on the effect of thermal stimulation on 575
Synapses, comparable, in mature and larval lobster muscle 97
Synaptic vesicles, in differentiating neuroblastoma ×glioma hybrid cells 903
Syncytium, osmoregulatory, and associated cells in a fresh water mosquito 271

T

Tannic acid, -paraformaldehyde-glutaraldehyde fixation of rat adrenal cortex 975
Tardigrade, cuticle, freeze-fracture studies on 329
Tendon cells, in opercular filament of a polychaete annelid 557
Tentacles, catch and feeding, in a sea anemone 939
Thrombocyte, in peripheral blood of nurse shark 437
Tick, ultrastructural identification of neurohaemal sites in 317
Tight junctions 1
Tissue culture, changes in bovine pulmonary artery endothelial cells irradiated with a $^{137}$Cs source 193
——, HeLa cell adhesion to microcarriers 181
——, — attachment to microcarrier beads 167
— —, of rabbit tracheal epithelium, localization of tubulin in cilia of 39
— —, reversibility of the effects of ACTH and cytochalasin B on the ultrastructure and steriodogenic activity of adrenocortical tumour cells *in vitro* 805
— —, some factors controlling cell polarity in chick retinal pigment epithelial cells in clonal culture 993
——, the effect of ascorbate on embryonic chick sternal chondrocytes cultured in agarose 683
Tracheal epithelium, cultured, localization of tubulin in cilia of 39
Transport, of water and ions, in an insect osmoregulatory syncitium 271
—, ——, in gills of a crab acclimated to fresh water 585
—, ——, in Malpighian tubules of larval mayfly 627
Triton X-100, functional extracted models of newt lung epithelia 277
——, influence of, on catfish olfactory mucosa 245
Tubulin, immunocytochemical localization of, with colloidal gold, in cilia of rabbit tracheal epithelial cultures 39
Tumour cells, adrenocortical, *in vitro* 805
Turbellarian, an ultrastructural study of oogenesis in a marine triclad 405
Tyrosine storage vacuoles, in insect fat body 137

V

Vacuoles, tyrosine storage-, in insect fat body 137
Verapamil, alteration in surface substructure of frog urinary bladder by 737
Vitellogenesis, in a marine triclad 405
Vitellogenin, subcellular localization of, in crustacean adipocytes by the unlabelled antibody enzyme method 301
—, synthesis, and previtellogenic development in the fat body of a mosquito: an ultrastructural and immunocytochemical study 281

W

Water, intracellular, and monovalent ion content, of rat hepatocytes, revealed by energy dispersive X-ray microanalysis and interference microscopy 515
WIRL cells, alterations of the cytoplasmic organization of, induced by trifluoperazine 983

X

X-ray microanalysis, effect of primycin on the intracellular monovalent ion and water content of rat hepatocytes, as revealed by 515
— —, electron-probe, localization of calcium by, in the small intestine of suckling rats 417
— —, of copper and sulphur-containing granules in the fat body cells of homopteran insects 311

Y

Yolk, subcellular localization of vitellogenin in crustacean adipocytes by the unlabelled antibody enzyme method 301
—, previtellogenic development and vitellogenin synthesis in the fat body of a mosquito 281

Z

Z-band, or cardiac muscle, rapid isolation of 17
